Government
Transformation Enablers

Welcome to DataStars!

A space for #TransformationEnablers

Purpose

“Born with a clear purpose of empowering governmental entities with simple but agile approaches to digitize and maximize the government performance.”

We are a recognized government transformation partner who has been awarded so many government transformation projects with 100% success rate and scalable success stories.

We present the synergy of consulting services, technology solutions and system integrations. So we renovated our new hybrid version of synergy of:

- Industry Subject Matter Experts (SMEs);
- Agile Technology Professionals; and
- Business Process Advisors.

Vision & Purpose

“To be the Government Enabling Partner of Choice”
This is our Vision

“To Deliver innovative solutions; Maximize Performance; Realize Transformative Values; Create Sustainable Impact; Enable Our Customers” This is our Mission

Our Niche & Offerings

We are born to empower the National Vision Bureaus and Government Productivity Transformation initiatives from the mandate of the supreme leadership to the completion of work and the oversight of results through an integrated system to automate and strengthen government performance

Our Government Transformation Capabilities

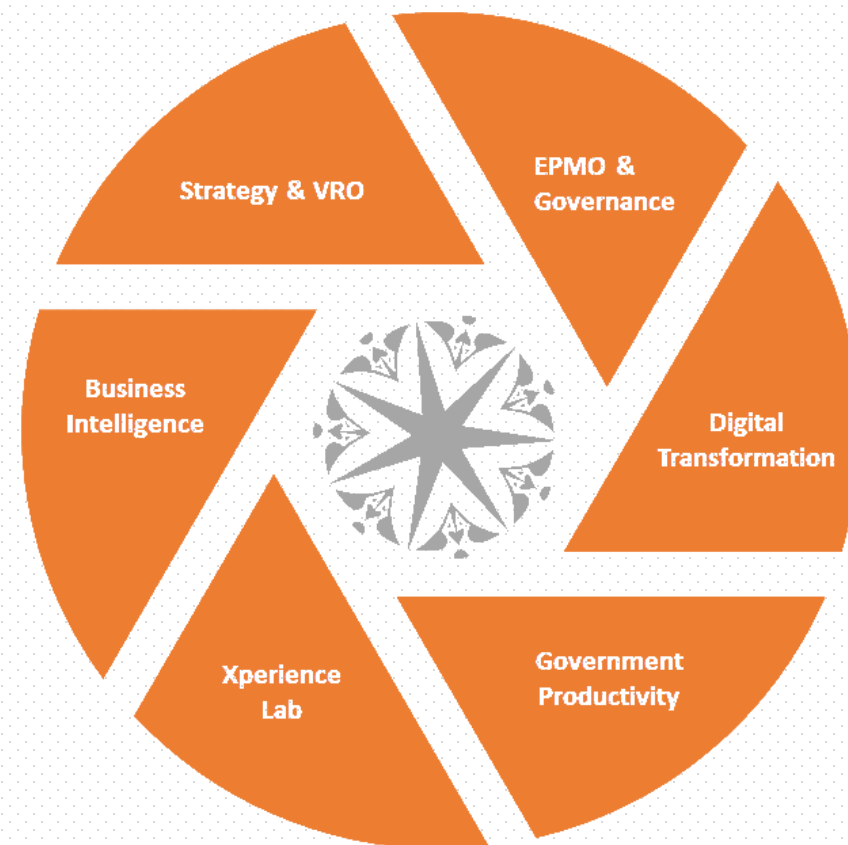

6 Core offerings for Government Transformation

Believing in the specialization; we render end-to-end government transformation services. Like a One-Stop-Shop!

DataStars' 6 core offerings for Government Transformation represent end-to-end value proposition to enable organizations, invest in internal capabilities and unleash internal leadership.

We empower governments organizations to reach the optimum performance leveraging the following technology and consulting practices: Strategy & VRO, EPMO & Governance, Digital Transformation, Government Productivity (Committees & Mandates), Xperience Lab, and Business Intelligence.

Our Solutions | GPM® Suite

End-to-End Government Productivity Transformation

Government Productivity can be accomplished through implementing and automating lean processes and transparent reporting mechanism across all processes.

GPM® presents its end-to-end platform that contains:
